DETAILED ACTION

Election/Restrictions

1. The examiner attempted to contact the power of attorney on February 10, 2006, but was unsuccessful.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 2, 7, 8, and 9, drawn to registering fluoroscopic images, classified in class 382, subclass 132 and 294.
- II. Claims 1, 3, 4, and 6, drawn to a registration artifact, classified in class 600, subclass 414 and class 606, subclass 97.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed, such as the registration artifact being adapted for being held within a field of view of an imaging device without attachment to the patient. The subcombination has separate utility such as image segmentation or region of interest identification on a single image.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
